

Is your decision to become a parent impacted by your sickle cell status?

ONLINE RESEARCH STUDY FOR PEOPLE WITH SICKLE CELL DISEASE OR TRAIT

PURPOSE

We are fostering the development of informed parenting choices for people aged 18-45 with sickle cell disease or trait

We invite you to engage with the study if:

- 1. You have sickle cell disease or trait
- 2. You are 18-45 years of age
- 3. You plan to have a child within the next two years

WHAT YOU GET TO DO: Answer questions about your experience with sickle cell and share your plans and beliefs related to parenting choices during a two-year period

WHAT WE WILL PROVIDE: Educational material about sickle cell and parenting options through an online platform

HOW YOU WILL MAKE AN IMPACT: Your participation in this study may provide you with new insights about your parenting intentions and options and may help other people with sickle cell that may want to have children in the future
